PERSONAL SUMMARY

Bachelor of Education Technology graduate with expertise in website development, visual media production, graphic design, and data analysis. Experienced in combining creativity and technology to design innovative and effective educational solutions. With a focus on curriculum development, interactive learning design, and educational technology implementation, I am ready to make proactive contributions, both independently and in teams. My skills include visual material creation, responsive website development, and data analysis to improve the quality of learning programs.

WORK/INTERNSHIP EXPERIENCE

Tutor, Algorithmics Surabaya Branch | October 2024 - Current

- Teaching Python from basic to professional level to students with various backgrounds, covering core concepts such as variables, functions, loops, to advanced project development.
